

Reading- Continue reading your school book and library book. Get your adult to ask you questions about it. Could you make a quiz for other children? This is a great opportunity to widen your reading, is there something you could read online, a magazine, a newspaper, a graphic novel, the possibilities are endless! Use this time to really find what you love to read. Write book reviews for some of the books you have read, this will really test your knowledge! Try the reading activities that are on our class page.

Literacy- Keep writing your daily diary, it's important to keep up your wonderful handwriting. Write a letter to your future self. Explain what is happening at the moment and how you feel about it all. You could give your future self some advice on how to manage your time and feelings or even set yourself some goals. Could you write a recount of the things you got up to during the Easter holidays? Here is a challenge for this week: Pick a topic such as girls' names or chocolate bars and you have to write down a name or a chocolate bar for each letter of the alphabet. You could even have a competition and see who can write the most, the quickest.

Maths- If you haven't already, make sure to check out the Maths test, multiplication word problems and reasoning questions that are on our class page. Remember to keep practising your 2,3,4,5,8 and 10 times tables, challenge yourself and see if you can learn any others. White Rose Maths have free worksheets and this is the scheme we follow at school. We had just finished our Length and Perimeter topic, have a look at some of the resources on this and see what you can remember. Our next topic is Fractions. See what you can remember from Year 2 and have a go at testing your knowledge!

RE-Create your own collective worship. What important objects would you want at your collective worship. Think about the scripture that is important to you, or that might reflect the difficulties we are facing right now. You might want to include a song that has a special meaning.

Science- Keep accessing the STEM learning website (link: <https://www.stem.org.uk/audience/primary>) for not only Science resources, but also Maths and Computing resources to. Think about our previous topics, can you sort materials into magnetic and non-magnetic? Our current topic is Plants, have a look in your garden, can you spot any plants? Have a go at drawing the plant, do you think you could name any of the parts of the plant? Our next topic is all about humans, including animals. Try finding out what different animals eat and information about food chains. You could draw around your adult or get them to draw around you and see if you can name the different parts of the body.

Geography- Can you identify where we live on a map of the UK? Try learning the names of different cities around the UK and think about who might have settled in these areas. Draw a map of the area surrounding your home, can you add symbols and a key?

History- Think about everything we learnt about the Stone Age. Could you make a quiz for someone else? How about trying to compare Stone Age life to Modern Day life like we did? Our next topic is about the Roman's so find out as much as you can about them. Create a mindmap, a poster, a drawing, whatever you like to show off what you learn.

Spanish-Keep practising your numbers, greetings, colours, days of the week and months of the year in Spanish. Youtube is a great resource for practising how to pronounce the words. Can you test yourself to learn even more than we already know? Why not download the app: Duolingo, where you can not only improve your Spanish but learn other new languages too!

PE- We have learnt lots of different ways of moving, jumps, balances and rolls in our Gymnastics lessons this year, keep practising them and maybe put on a show to your family to showcase your abilities. Keep watching Joe Wicks, The Body Coach, channel on youtube for workouts every morning. Use Go Noodle for yoga and mindfulness activities. Have a fun game outside with your family and play the opposite game: The leader says, "Jump high!" so you jump low.

PSHE-At this time of uncertainty, it is important to keep talking to each other about how we are feeling and about how you can help boost a child's self-esteem. This is a totally new environment for everyone and the children are bound to feel confused and stressed, that is perfectly fine. As long as they are happy and healthy and trying to do something academic every day, then that is ok.

Art- A challenge for this week! Take out your favourite animals or figurines and a piece of paper and pencil. Place the animal next to the paper, near a window so that a shadow forms. Draw around the shadow and then spend some time colouring it in. You could create your very own masterpiece!
